## *Food and Environment Safety*

ISSN 2068 – 6609

[www.fia.usv.ro/fiajournal](http://www.fia.usv.ro/fiajournal)

Editor in Chief: Prof. Ph.D. eng. Sonia GUTT

*Food and Environment Safety* is a quarterly publication (4 issues per year) of the **Faculty of Food Engineering**, Ștefan cel Mare University - Suceava, Romania, that is assessed and acknowledged B+ by the main Romanian funding organization for university and postgraduate research programmes - National University Research Council (CNCSIS) and it is also indexed in the International Database: IndexCopernicus Journals Master List.

The purpose of *Food and Environment Safety* journal is to provide a means of rapid publication of significant

contributions to the improvement and diversification of specific activities in the field of food engineering, food and environment safety, biotechnologies, chemical engineering, biosensors, agriculture and applied sciences as well. Moreover, the journal assures promotion of research results in the field of food production and, from the nutritional and toxicological point of view, it underlines the importance of applying the best analyzing and control methods for consumer's protection, food technologies, industrial biotechnologies and environment protection as well to increase life quality. Food Engineering Faculty journal has been published since 2000 like *Analele Universitatii Ștefan cel Mare Suceava - Secțiunea Colegiul Tehnic* (ISSN 1583-2295). Between 2002 and 2004 the journal was published biannually like *Analele Universitatii Ștefan cel Mare Suceava - Secțiunea Inginerie Alimentară* (ISSN 1583-2295), then from 2005 till 2009, it was issued biannually like *ANNALS of Suceava University - Food Engineering* (ISSN 1842-4597). In 2010, the Food Engineering Faculty journal changed its name in *Food and Environment Safety* (ISSN 2068 - 6609).

In the issues of the year 2010 of the scientific journal *Food and Environment Safety*, a few interesting research papers presented in the international conference "*Biotechnologies, Present and Perspectives*" organized by the Faculty of Food Engineering, Ștefan cel Mare University, Suceava, Romania, November, 19<sup>th</sup> - 20<sup>th</sup>, 2010, were published. Specialists in the food industry field from 9 countries (Armenia, Bulgaria, Germany, Lithuania, Moldavia, Romania, Spain, Slovakia, Ukraine) have participated in the conference.

Moreover, some subjects discussed in the Grundtvig Workshop: "*Challenges in food safety and food quality control*" organised by the Faculty of Food Engineering, Ștefan cel Mare University, Suceava, Romania, May, 17<sup>th</sup> - 22<sup>nd</sup>, 2010, were published in the no. 1 / 2010 of the scientific journal *Food and Environment Safety*. The purpose of the workshop was to bring together learners, people interested in food quality, persons involved in adult education, food service educators, consultants or researchers in food issues. The main aim of the workshop was to provide participants with the opportunity to share their views, opinions and ideas regarding food safety and food quality control. The participants were from Cyprus, Latvia, Lithuania, Spain, Turkey. The Grundtvig Workshop: "*Challenges in food safety and food quality control*" has been funded with support from the European Union's Grundtvig programme, project 2009-1-RO1-GRU13-03339, ref. no. GRU-09- GRAT-20-USV. This paper reflects the author's views only and was financially supported by the above mentioned Grundtvig project.

# Polskie Towarzystwo Medycyny Rodzinnej oraz Stowarzyszenie Przyjaciół Medycyny Rodzinnej i Lekarzy Rodzinnych

Kwartalnik FAMILY MEDICINE & PRIMARY CARE REVIEW (dawniej: Polska Medycyna Rodzinna) jest recenzowanym czasopiśmie naukowym, adresowanym do osób zajmujących się badaniami naukowymi w dziedzinie medycyny rodzinnej, podstawowej opieki zdrowotnej oraz w dziedzinach pokrewnych, nauczycieli akademickich medycyny rodzinnej, lekarzy rodzinnych i innych osób pracujących w podstawowej opiece zdrowotnej, lekarzy w trakcie specjalizacji, rezydentów oraz studentów. Czasopismo przeznaczone jest także dla osób zajmujących się badaniami doświadczalnymi i epidemiologicznymi z zakresu innych dyscyplin medycznych.

Redakcja przyjmuje do druku prace w języku polskim i/lub angielskim (UK English). Publikowane są one w następujących działach kwartalnika:

- Artykuły redakcyjne (Editorials);
- Prace pogładowe (Reviews);
- Prace oryginalne (Original papers);
- Prace kazuistyczne (Case reports/studies);
- Kształcenie ustawiczne (CME);
- Sprawozdania (Reports);
- Listy do redakcji (Letters to the Editor);
- Recenzje książek i przeglądy piśmiennictwa (Book/literature reviews);
- Komunikaty (Announcements);
- Varia

Priorytet w druku mają prace oryginalne oraz publikacje w języku angielskim.

Kwartalnik został doceniony przez lekarzy rodzinnych, Ministerstwo Zdrowia, CMKP oraz konsultanta krajowego w dziedzinie medycyny rodzinnej – czasopismo znajduje się w wykazie lektur obowiązujących do egzaminu specjalizacyjnego z medycyny rodzinnej.

Kwartalnik jest indeksowany przez EMBASE/Excerpta Medica oraz Index Copernicus: 6,17 pkt. oraz MNiSzW: 6 pkt.

Pismo jest redagowane

## IndexCopernicus™ Evaluation Methodology 2010

### Stage 1. Detailed Parametrical analysis

Following groups of parameters are being evaluated:

– Scientific quality	580 base points	(58.0%)
– Editorial quality	200 base points	(20.0%)
– International availability	135 base points	(13.5%)
– Frequency-Regularity-Stability	50 base points	(5.0%)
– Technical quality	35 base points	(3.5%)
<b>Total</b>	<b>1000 base points</b>	<b>(100.0%)</b>

### Stage 2. Negative score analysis

Negative score is given for:

- irregular or late issuance [late up to one publishing period (-30), joint issues (-50), late more than one publishing period (-60)];
- non-ethical advertisement placement [within article (-60), directly before/after article (-40)].

### Stage 3. Experts peer-review

Experts peer-review of evaluated journals change the total score by  $\pm 60$  points (12%):

- Scientific significance of the published material [ $\pm 20$ ],
- Up-to-date content [ $\pm 20$ ],
- Educational value [ $\pm 20$ ].

### How do we calculate Index Copernicus Value (ICV)

First, Base Points (BP) are converted into 10 points Total Basic Score (TBS), then:

- A) For journals indexed in Thomson Scientific Index Copernicus Value (ICV) is being calculated based on the following formula:

$$9 + [(TBS) \times (IF)] \text{ (where IF = impact factor value).}$$

This formula ensure that the journals indexed at Thomson Scientific have minimum ICV=9 points.

- B) For the rest of journals which are NOT indexed in Thomson Scientific **TBS=ICV**

### I. Scientific Quality

The following parameters have been evaluated:

- International indexation. Three levels of indexation has been defined:
  - Basic level – indexation in international bibliographic databases EXCEPT Index Medicus/MEDLINE and Current Contents.
  - MEDLINE level (indexation at Index Medicus/MEDLINE). The score can be lowered if a journal does not deliver or is late with delivering XML files according to Medline requirements.
  - Indexation at Philadelphia Institute of Scientific Information's Master Journal List (based on impact factor). IF is used in the calculation algorithm of Index Copernicus Value (ICV) – see above.
- Annual percent of original research papers*  
Original research paper is that, which presents results of empiric investigation (clinical or laboratory), which is divided into the following sections: background, material and methods, results, discussion, conclusions, references. The percentage of this original works published in a journal reflects its character (scientific or educational) and indicates the potential interest of researchers in publishing there.
- Number of papers published annually from centers outside the journal's country of origin*  
Indirectly indicates a degree of journal's acceptance on international market. The more international publications – the higher the score.
- Number of all papers published on annual basis*

Reflects potential authorship and acceptance for the journal. Only papers published in regular issues are being considered. Papers published in special issues or supplements are not being counted as they are considered not to undergo the regular peer-review process. It is also being assessed if the papers published

in a journal come from a source associated with publisher or editorial board only, what lowers the IC score.  
5. *International Editorial Board* adds to the score, for it creates a chance for further journal's development.

## II. Editorial quality

1. Cover page [all the following items should appear clearly: journal's title, ISSN, frequency, volume/issue/part number, month/year].
2. The uniform composition of presented manuscripts compatible to journal's instructions for authors, forms the leading element of editorial quality. The following parameters are being evaluated:
  - a. Summary should count 200–250 words and have structural form, i.e. reflect structure of an article (background, material and methods, results, conclusion). Non-structural summaries counting less than 200 words lower the score.
  - b. Key words should not repeat the title of manuscript. The most desirable is to use key words from the MeSH catalogue.
  - c. Uniform presentation of original manuscripts. Research works should be divided to background, material and methods, results, discussion, conclusions, references.
  - d. References should be presented in consecutive order (as they are cited in the text). First six authors should be presented. Journal title abbreviations should be in Medline standard. Arab numbers in bracket or in upper index should mark citations in the text. Each citation item should be placed in a separate paragraph.

Alphabetical order, "en block" presentation or incorrect abbreviation of journals title lowers the score.

3. Information for authors should be included into each journal's issue, and should contain: General rules of manuscripts evaluation process, disclosing conflicts of interest between referee-author, referee-research sponsor, author-research sponsor, patient's privacy rights and ethical issues in animal and clinical research (Editorial Policy).
4. Detailed editorial and technical information regarding manuscript preparation (Instruction for Authors)
5. Editorial information should include list of Editorial Board members, editorial correspondence address, name and address of a publisher, ISSN and frequency of issuance (monthly, quarterly)
6. Advertisements should be placed on editorial pages (at the beginning and/or at the end of a journal). Advertisement within scientific content, i.e. before, inside and directly after an article is undesirable and lower the IC score.

## III. International availability

International availability is important for proper development of a scientific journal. Two factors are taken into consideration:

1. Language of publication. English is preferable, since this is the universal language of science. Journals published in other languages should have full size (200–250 words) structural summaries in English and bilingual article title as well as table/figure subtitles.
2. Internet availability. Internet becomes an important medium for scientific publication and exchange of professional information. It is due to its global availability and speed and low cost of publication, comparing to printed journals. Internet availability enhances a chance to broaden journal's circulation and speeds up its development. The access to editorial information, table of contents, summaries and full text articles and search tools are evaluated. The preferred language of a Website is English.

## IV. Frequency-Regularity-Market stability

This group of parameters is to assess the editor's publishing/managing efficiency. We evaluate:

1. Regularity of issuance, which is an important factor for journal's stability and one of the key evaluation parameter at other international indexing databases such as Medline and Current Contents. Journals of an irregular issuance, late, or those, which issue joint issues, receive a lower score.
2. We add score to journals depending on their continuous presence on the market.

## V. Technical quality

Technical quality discloses the ability for proper presentation of the scientific content. The quality of pre-print process, especially desk top publishing (DTP), ability to print in color, and the quality of paper (acid-free is preferred) are evaluated. The A4 format of a journal is preferred.

## SCIENCE GOES DIGITAL!

Is your journal not available on the Internet?  
You have archive of your journal only in hard copies?

Go for Google FREE Digitization!  
It is absolutely free of charge and your journal will also take advantage of the opportunities of the indexation in Index Copernicus.

The purpose of the Google free digitization project is to convert printed scientific publications into electronic files. Electronic files are easier to manage and their appearance on the internet will allow wider range of readers to find your journal. This way it is promoted on the global scale and is more likely to be cited. Thanks to the Google platform scientific achievements will become part of the World heritage and will be easily accessible.

Promote your journal. Make it digital.

CAIETE DE DREPT  
INTERNACIONAL

international

fondator dr. Marian MIHĂILĂ

## JOURNAL of

- The Faculty of Economic and Administrative Sciences, Eftimie Murgu University Resita
- The Romanian Society for the Protection of Cultural Property
- The Association of European Recognized Experts Paris  
–AEXEA, France

*The Journal appears four times a year in a printed version starting with the year 2003, in a bilingual version (Romanian language and the second language is an international language or that of the author's, if it is not an international recognized language).*

*The theme of the journal is oriented towards a segment defined by international law and by its branches, but also towards the domain of international relations, especially diversified during the last years.*

*The target groups are internal: state or private universities and local and central public institutions and authorities, which in a form or another work with international law or relations in their different shapes; international: universities, international organizations with a universal or specialized vocation; or regional: like non-funded organizations which develop activities in the domain of protection of cultural property.*
